## A special note about the Federal Government's directive with respect to post-secondary students and recent graduates:

- Post-secondary students and recent graduates who are ineligible for the Canada Emergency Response Benefit or for Employment Insurance, but who are unable to find full-time employment or are unable to work due to COVID-19, may apply for the Canada Emergency Student Benefit (CESB). The CESB would provide \$1,250 per month for eligible students from May through August 2020, and \$2,000 for students with dependents and those with permanent disabilities. The CESB will be delivered by CRA. More information is found [here](#) (current as of May 13).
- The Government of Canada announced a new Canada Student Service Grant which will provide up to \$5,000 to support student's post-secondary education costs in the fall. More details to follow (current as of April 22).
- The Government of Canada will revise the Canada Student Loan Program's eligibility requirements in 2020-21 to allow more students to qualify for supports and be eligible for greater amounts, including doubling the non-repayable Canada Student Grants for full and part time students, as well as for students with disabilities and students with dependents, in the coming academic year. The changes are expected to expand the reach of the program and the benefit to more than 760,000 students at an estimated cost of approximately \$1.9 billion over two years starting in 2020-21 (current as of April 22).
- The Government of Canada will revise various student and youth employment programs, such as the Youth Employment and Skills Strategy. More information is found [here](#) (current as of April 22).

## A special note about the Federal Government's directive with respect to international students:

- As announced on March 20, 2020, international students who held a valid study permit or had been approved for a study permit when the travel restrictions took effect on March 18, 2020, will be able travel to Canada by air or land. They will be exempt from air travel and border restrictions. This exemption is to accommodate students who are in the middle of their course of study or who have just been approved to study in Canada but were outside Canada when the travel restrictions took effect (current as of March 26).
- Courses of study being delivered online on an exceptional basis due to COVID 19 will not affect Post-Graduation Work Permit (PGWP) Program eligibility (current as of March 26).
- Students who have a study permit or who have been approved for a study permit for a program starting in May or June may begin their classes while outside Canada and may complete up to 50% of their program while outside Canada if they cannot travel to Canada sooner (current as of April 16).
- Individuals who are already legally in Canada will be able to remain in the country (current as of March 26).
- Temporary residents who are currently in Canada are able to apply to extend their status online if they need to extend their status. A temporary resident who has applied to extend their status is allowed to remain in Canada until a decision is made on their new application, even if their initial status expires while they are waiting for that decision. This is called implied status (current as of March 26).
- At least one post-secondary institution has suspended the intake of new incoming International students from overseas for the Spring Semester beginning in May (current as of March 26).
- The Government of Canada is temporarily allowing international students holding study permits, who are eligible to work off campus and already present in Canada, to work more than 20 hours per week while classes are in session, provided they are working in an essential service or function, such as health care, critical infrastructure, or the supply of food or other critical goods. This change is in effect until August 31, 2020 (current as of April 22).
