As technology continues to advance at a rapid pace, data protection and privacy issues continue to create an increasing number of business, legal and reputational risks. From smart technologies and artificial intelligence to issues around global compliance, digital consent and online reputations, organizations will need to understand the legal frameworks and best practices to navigate these issues and remain secure.

BLG's skilled Cybersecurity, Privacy & Data protection team has extensive experience to help organizations address these risks. We are further committed to bringing together leaders and experts in a variety of fields to share their knowledge and insights on how to best manage privacy in an increasingly connected world.

Managing Privacy in a Connected World – Webinar Series

Throughout the year, we will host a series of webinars that will continue to bring together leaders and experts in a variety of fields related to privacy, data protection and cybersecurity who will share their knowledge and insights to help your organization achieve its business and growth objectives. These webinars will provide you with the latest updates and trends that will help your organisation navigate Canadian and international privacy requirements laws and regulations as well as mitigate potential corporate risks.
