

EVENT

Rethinking the organization of work in the age of artificial intelligence

October 07, 2024
12:00 p.m. - 1:00 p.m. ET

Webinar
Connection details will be provided after registration.

This presentation will be in French only.

As artificial intelligence (AI) rapidly transforms the organizational landscape, it is crucial for Québec organizations to adopt a global strategy to maximize this technology and achieve their objectives. This will open up new possibilities and opportunities.

The objective for the future is not to let the various products resulting from this technology dictate the next stages of transformation. Instead, the goal is to integrate it strategically and thoughtfully into work processes to improve efficiency and innovation in the organization.

Join us for this 60-minute webinar by [Katherine Poirier](#) from BLG and [Emilie Pelletier](#) and [Didier Dubois](#) from [Humance](#). In it, we aim to demystify AI and identify the levers to create a harmonious synergy between internal teams and AI. This will enable you to maximize the benefits while maintaining a human-technology balance. Additionally, we'll address the legal issues in integrating this new technology and its impact on the way we work.

Please respond by October 3. If you have any questions about this event, please write to RSVPMontreal@blg.com.

CPD information

QC | Please note, the concept of "recognition" or "accreditation" has been abolished. By doing this, the Barreau is trying to make it easier for lawyers to claim mandatory CLE credits without a formal accreditation process. It is now up to individual lawyers to determine the eligibility of a training activity and to declare the hours in their "Dossier de formation en ligne".

This event is recognized for accreditation by the Ordre des conseillers en ressources humaines agréées (CRHA) for this event.
