Join us in person for the inaugural BLG x ISS-Corporate event: Proxy Season Update where we will discuss the key trends and developments that public companies will face in the 2024 proxy season.

Our speakers from Borden Ladner Gervais (BLG) and [ISS-Corporate](#) will share their insights on:

- Preparing for the 2024 Proxy Season: What are the hot button issues for institutional investors and proxy advisory firms? What are new or pre-existing proxy advisory guidelines which you should be considering?
- Regulatory updates: How to stay abreast of the evolving regulatory landscape and expectations from securities regulators, stock exchanges and other stakeholders, and address emerging issues such as ESG disclosure, board oversight, executive compensation, and shareholder rights.
- Proactive Shareholder Engagement in the Age of ESG: How to remain proactive in engaging the growing group of investors looking for improved disclosure on emissions and related strategy, human capital management, and other sustainability issues. This session will also consider the role of sustainability concerns in shareholder activism.
- Cyber risk: How to assess your firm's cyber risks, understand how investors and insurers are quantifying your risk profile and measuring your board's oversight and capacity around information security.

The event will also feature a Q&A session where you can directly engage with speakers and network with your peers.

Don't miss this opportunity to prepare for the 2024 proxy season and learn from the experts.
