BLG releases fourth edition of Life Sciences & Chemistry Patent Practice in Canada: A Practical Guide

National (March 15, 2022) - The fields of life sciences and chemistry in Canada are rapidly expanding and innovation in biotechnology is critical for preparing for the future.

Our newly released fourth edition of ***Life Sciences & Chemistry Patent Practice In Canada: A Practical Guide*** will keep our readers up to date on changes to patent practice that are relevant to the industry while outlining the aspects of Canadian patent practice most relevant to our clients in Canada and around the world.

The book features multidisciplinary perspectives from lawyers and agents across the firm to provide expert cross-practice perspectives on chemistry and biotechnology-related innovations. We include information on various other legal specialties that relate to commercial products covered by biotechnology and chemistry patents.

“Patent agents, attorneys, lawyers, trainees, in-house counsel, technology transfer officers, and inventors specializing in the life sciences and chemistry sectors, will find the book useful in keeping up to date on important industry-related developments and changing practice requirements” said Graeme Boocock, Patent Agent and Partner at BLG.

BLG’s multidisciplinary Health Care and Life Sciences team of lawyers and patent agents has extensive knowledge and experience in both the public and private health sectors, the only team to achieve a Chambers band 1 ranking in Canada.
