

Federal Financial Institutions Legislative and Regulatory Reporter - September and October 2019

November 29, 2019

The Reporter provides a monthly summary of Canadian federal legislative and regulatory developments of relevance to federally regulated financial institutions. It does not address Canadian provincial financial services legislative and regulatory developments, although this information is tracked by BLG and can be provided on request. In addition, purely technical and administrative changes (such as changes to reporting forms) are not covered.

The September 2019 edition follows below.

Financial Action Task Force	<u>October 31, 2019</u>	Public consultation on FATF draft guidance on digital identity The Financial Action Task Force (FATF) is developing guidance to clarify how digital identity (digital ID) systems can be used for customer due diligence (CDD). The _ draft guidance intends to help governments, financial institutions and other relevant entities apply a risk-based approach to the use of digital ID for CDD.	Responses due by November 29, 2019.

		The FATF is consulting	
		private sector	
		stakeholders before	
		finalising the guidance. It	
		is primarily seeking views	
		from banks, virtual asset	
		service providers and	
		other regulated entities,	
		but also welcomes views	
		from authorities.	
		Best Practices on	
		Beneficial Ownership for	
		Legal Persons	
		In 2003, the FATF set	
		global standards on	
		beneficial ownership,	
		requiring countries to	
		ensure that their	
		authorities could obtain	
		up-to-date and accurate	
		information about the	
		person(s) behind	
		companies and	
		foundations and other	
		legal persons. These	
		requirements were	nents were
Financial Action Task		amended in 2012.	
Force	<u>October 24, 2019</u>	Assessments since then	
		have shown that many countries still find it	
		challenging to ensure	
		transparency of ownership	
		of legal persons.	
		This best practices	
		document aims to help	
		countries meet these	
		requirements. It	
		emphasizes that	
		jurisdictions using a multi-	
		pronged approach with several sources of	
		information are often more	
		effective in preventing the	
		misuse of legal persons for criminal purposes.	
		Regulatory issues of

		This note sets out	
		regulatory issues of	
		stablecoins.	
		The launch of stablecoin-	
		type arrangements for	
		domestic and cross-	
		border retail payments	
		with the potential to reach	
		global scale could alter	
		the current assessment	
		that crypto-assets do not	
		pose a material risk to	
		financial stability.	
		At the same time, the	
		emergence of global	
		stablecoins that could be	
		used for cross-border	
		payments and remittances	
		by a large number of	
		users in different countries	
		could provide benefits to	
		the financial system and	
		the broader economy.	
		the broader coortenty.	
		Harnessing those	
		potential benefits, while	
		containing associated	
		risks for the financial	
		system, requires adequate	
		and comprehensive	
		regulatory and oversight	
		arrangements. An	
		effective regulatory and	
		supervisory approach	
		needs to be able to	
		identify, monitor and	
		address potential risks in	
		a reasonable range of	
		scenarios and use cases.	
		The FSB will submit a	
		consultative report to G20	
		Finance Ministers and	
		Central Bank Governors in	
		April 2020, and a final
