During this period, the AMF retained oversight and the Chambre de la sécurité financière's mandate remained unchanged, ensuring continuity of investor protection. Key milestones included AMF notices issued in 2024 and 2025 delegating examination and registration powers to CIRO, enabling CIRO's Montréal staff to conduct compliance examinations and process registrations for Québec dealers

and their representatives, with the full transfer of functions expected to take effect by July 4, 2026.

- January 29, 2026 - CIRO published a Guidance Note concerning [Procedures for Handling Certain Designated Trades as Principal](#). The note sets out the regulatory framework and procedures under UMIR for investment dealers seeking to execute significant block trades as principal through an off-marketplace “take-on” transaction followed by an on-market “unwind” and distribution to clients. It explains when and how exemptions from UMIR 6.4 may be granted, the conditions that must be met (including market impact, pricing, absence of significant pre-existing client orders, and compliance with the Order Protection Rule), and the responsibilities of all Participants involved, whether acting as primary, secondary, or additional distributors. The guidance details execution, order marking, allocation, reporting, and timing requirements, addresses multi-dealer transactions and exceptional scenarios, and provides a comprehensive application template to ensure transparency, market integrity, and orderly distribution of large blocks of listed securities.
- January 29, 2026 - CIRO published a Guidance Note about [Obtaining a Trading Exemption or Rule Interpretation](#). The note explains how Participants and Access Persons can request either an exemption from, or an interpretation of, the Universal Market Integrity Rules (UMIR), with a focus on exemptions allowing off-marketplace trades under UMIR 6.4 and general exemptive relief under UMIR 11.1. It outlines the criteria CIRO applies when considering exemptions, the process for seeking rule interpretations, and the information required for exemption applications. The document provides detailed guidance on common exemption scenarios—such as distributions from control, exempt take-over bids, normal course issuer bids involving controlling shareholders, and certain designated trades—as well as CIRO's review, ruling, and follow-up procedures. The Amendments will bring UMIR requirements in line with US requirements and will become effective on November 2, 2026.
- December 17, 2025 - CIRO published a bulletin concerning [Access to Online Advice in the Advisory and Managed Channels](#). It confirms that trades in each currency are treated as distinct for determining arbitrage activity, last sale price, best ask, and best bid, but trading volumes in both currencies may be aggregated to assess whether a security qualifies as “highly-liquid.” This update, part of CIRO's UMIR Guidance Update Project, introduces no material changes but aims to improve clarity and compliance for investment dealers.
- November 5, 2025 - CIRO released updated [Guidance on Double Printing](#), clarifying the prohibition against "double printing" under the Universal Market Integrity Rules (UMIR). - November 5, 2025 - CIRO released updated guidance concerning the [Application of UMIR to the Trading Activity of an Access Person](#), which clarifies how the Universal Market Integrity Rules (UMIR) apply to the trading activity of an Access Person. It emphasizes that Access Persons are subject to the same prohibitions and obligations as Participants regarding manipulative or deceptive practices, improper orders, short selling, order entry, designations, and trading supervision, and reiterates key requirements including, compliance with marketplace rules, maintaining audit trails, reporting short positions, adhering to gatekeeper obligations, proficiency obligations and risk controls. This update, part of CIRO's UMIR Guidance Update Project, introduces no material changes but aims to improve clarity and compliance for investment dealers.
- October 29, 2025 - CIRO released an [Update on the project to develop rule amendments relating to the proposed adoption of an incorporated advisor compensation option](#). The project involves rule amendments to harmonise advisor compensation options for investment and mutual fund dealers, aiming to allow individual advisors to be compensated through personal corporations under a new “Incorporated Approved Person” category. CIRO has published a position paper, gathered stakeholder feedback favouring broader use of personal corporations, and submitted a proposal to the Canada Revenue Agency (CRA) for tax guidance. Next steps include finalising rule amendments, seeking CSA approval, and implementing changes to facilitate a more flexible, professional compensation structure for advisors, with the goal of enhancing investor protection and access to advice.

- accreditation and CERTS listing into one process with a \$350 fee, and ensures courses remain valid through CE cycle transitions.
- October 21, 2025 - CIRO issued [Updated Guidance on Trading Halt Procedures for CDRs and Single-Stock ETFs](#), with procedures varying based on whether the underlying security is listed. CIRO will monitor and manually halt trading in CDRs and SSETFs when the underlying security is halted on a U.S. exchange or has a sponsored ADR but generally does not monitor or halt trading for those linked to other foreign markets, relying instead on Single-Stock Circuit Breakers (SSCBs) to address volatility. For SSETFs with Canadian-listed underlying securities, CIRO actively oversees trading and disclosure, retaining authority to impose regulatory halts as needed. The guidance also reiterates the frameworks for circuit breakers and regulatory intervention in trade variation or cancellation, aiming to ensure fair and orderly markets across all Canadian marketplaces.
 - October 16, 2025 – CIRO released a [Republication of Proposed Amendments — Fully paid lending and financing arrangements](#), seeking public comment by 16 November 2025. The key revision is the removal of the restriction that limited retail fully paid securities lending to non-registered accounts, prompted by anticipated changes to the Income Tax Act clarifying the permissibility of such lending in registered accounts. Additional non-material changes improve rule clarity and guidance, and the revised framework is designed to minimise future regulatory misalignment without compromising market integrity or client protection.

This would be further to the delegation of registration functions already made by Alberta, New Brunswick, Newfoundland and Labrador, Nova Scotia, Ontario, Prince Edward Island, Quebec, and Yukon. Manitoba is expected to follow, but their timing is not known. Comments are due by December 15, 2025.
 - October 8, 2025 - CIRO released a [Proposed Amendment of Approved Person Fees Component within the Annual Fee of Dealer Member Fee Model](#), specifically increasing the Approved Person (AP) Fees Component from \$250 to \$300 per AP annually, effective April 1, 2026. This change is intended to recover approximately \$6.5 million in incremental costs resulting from expanded registration responsibilities delegated to CIRO across multiple jurisdictions. CIRO will also cease collecting activity-based NRD fees and end cost recovery arrangements with certain provincial regulators. While the estimated overall CIRO fees to Dealer Members will increase by 5%, the impact is said to be minimal for small firms, with larger mutual fund dealers absorbing most of the increase due to their higher AP counts. Written comments on the proposal are due by November 7, 2025.
