EVENT

Managing Privacy in a Connected World - Webinar Series

September 29, 2020
1:00 p.m. - 2:00 p.m. ET

Webinar
Login details will be provided after you register.
(Note that the time is in EST.)

As technology continues to advance at a rapid pace, data protection and privacy issues continue to create an increasing number of business, legal and reputational risks. From smart technologies and artificial intelligence to issues around global compliance, digital consent and online reputations, organizations will need to understand the legal frameworks and best practices to navigate these issues and remain secure.

Please join us for the first session of a series of presentations that will bring together leaders and experts in a variety of fields who will share their knowledge and insights on how to best manage privacy in an increasingly connected world.

Our first webinar will feature Katherine McNeill who will address the topic of outsourcing — both the opportunities and risks involved.

Please watch for additional invitations highlighting our next few presentations.

Please respond by September 28, 2020.
