Jason assists inventors and businesses to protect and profit from their **technological innovations** in all **physics-related fields** . This includes mechanical devices, robotics (including AI/ML-powered robotics), transportation equipment, electronics, medical devices, industrial processes, water treatment, papermaking, industrial hygiene, batteries and fuel cells, currency and document security, and communications solutions. He has substantial knowledge and experience in the patenting of computer-related inventions, including cybersecurity, mobile applications, and gaming.

Jason provides strategic advice to help clients navigate the intellectual property landscape, including invention patentability, patent infringement and validity, and freedom-to-operate. **He drafts and prosecutes patent applications to grant, for Canada, the United States, and worldwide, and manages patent portfolios for innovators and enterprises.**

Jason has appeared before the Canadian Patent Appeal Board and the Trademarks Opposition Board, and has represented clients before the Federal Court of Canada and the United States Patent Trial and Appeal Board.

Experience

- Drafting and prosecuting patent applications to grant, and managing patent portfolios for innovators and enterprises, from individuals to Fortune 500 companies, in Canada, the United States and worldwide.

- Specializing in the fields of computer software and business methods, mechanical devices, and high-tech solutions.
- Advising on invention patentability, patent infringement and validity, and freedom-to-operate.
