Women in Tech Masterclass: "Board Governance Readiness"

Join [BDC Capital's Women in Technology Venture Fund](#), in partnership with Borden Ladner Gervais LLP's Driven By Women™, for the next Women in Tech (WIT) Masterclass series "Board Governance Readiness".

Driven by demand from the community, this masterclass will help women in tech leaders build and manage an effective board of directors for their company. The series is ideally suited to female founders and c-suite executives who are leading a Canadian technology start-up with the following criteria:

1. venture backed or venture backed shortly; and
2. board of directors in place or in the process of forming a board of directors.

This is a free, six-week virtual webinar series, in partnership with [BLG's Driven By Women](#), starting September 15, 2020.

Each week will feature a presentation, followed by a Q&A session with the experts at Borden Ladner Gervais LLP's Driven By Women™, who will offer practical insights to help you:

- create an effective board to support your business;
- expand your knowledge of the function of corporate governance and how it applies to your organizational structure;
- understand how to assess the core competencies of your board and identify deficiencies; and
- attract and compensate a diverse and competent board
