Managing Privacy in a Connected World: Session I

Outsourcing

This is the first session of a series bringing together leaders and experts in a variety of fields who will share their knowledge and insights on how to best manage privacy in an increasingly connected world.

As technology continues to advance at a rapid pace, data protection and privacy issues continue to create an increasing number of business, legal and reputational risks. From smart technologies and artificial intelligence to issues around global compliance, digital consent and online reputations, organizations will need to understand the legal frameworks and best practices to navigate these issues and remain secure.

Our first webinar features [Katherine McNeill](#) who addresses the topic of outsourcing — both the opportunities and risks involved.

Watch the webinar below

Services: [Cybersecurity](#), [Privacy & Data Protection](#), [Compliance with Privacy & Data Protection](#), [Privacy & Security Breaches](#), [Technology](#)
