Antoinette is a patent agent trainee in our Intellectual Property Group.

Antoinette conducted her doctoral research at St. Michael's Hospital with a focus on diabetes and heart failure with preserved ejection fraction. Her Masters research focused on protein folding/misfolding and antibody design, validation, and characterization. Prior to joining BLG, Antoinette was as a sessional lecturer at one of Canada's top universities, teaching current topics in Biochemistry.

Insights Rollup

- Author, "Sex differences in long-term effects of exertional heat stroke on myocardial metabolism," Journal of Physiology, 2020
- Co-Author, "Sirtuin 1 activation attenuates cardiac fibrosis in a rodent pressure overload model by modifying Smad2/3 transactivation," Cardiovascular Research, 2018
